*Presented by Carl Irwin, Industries of the Future - WV, at the Coal Utilization Technologies Workshop on September 22, 2004 at the National Research Center for Coal & Energy, Morgantown, WV. This meeting was part of the Energy Roadmap Workshop Series commissioned by West Virginia Governor Bob Wise.*

# Clean Coal Power Projects in West Virginia

Carl Irwin

IOF-WV Program

WVU National Research Center for Coal &  
Energy

(304) 293-2867 ext. 5403

# CCPI or CCT Projects in WV

- Greenbriar Co-Generation Project
  - 85 MW waste-coal to energy fluid bed combustor
  - “Eco Park” concept, e.g., turbine exhaust can be used for industrial uses such as drying hardwood in a steam kiln
  - Integrated co-production facility to produce value-added structural bricks

# The bigger picture for West Virginia coal and energy

- We are recognized as an energy State
- Energy-intensive industries are important to West Virginia
- There is untapped synergy between our energy resources and energy-intensive industries

# Energy-Intensive Industry Clusters

- New Martinsville area
- Ravenswood area
- CAZ region
- PAZ region
- Weirton/Moundsville area

# Clean Coal Power Opportunities

- Locate a high-efficiency coal gasification combined cycle plant within a cluster of energy-intensive industries
  - Low-cost, reliable power for the cluster – excess power sold to the grid
  - Improved regional air quality
  - Cooling water is available
  - Attract new industry to diversify local economy

# Creating Energy Advantages for WV Industry

- Makes sense to develop secure, economical, coal-based sources of power, heat, and chemical feedstocks for clusters of energy-intensive industries
- Makes sense for industry to use energy more efficiently
- Policy, legislative, and regulatory approaches - TBD

# More on energy/industry synergies at the 2004 IOF-WV Symposium

- Planning for the 2006 Mining Energy Solutions – Morgantown, WV Meeting
- Keynote session on Energy Issues for West Virginia Industry
- Let's create projects!
